

Eduardo Oliveira

SENIOR SOFTWARE ENGINEER

Coronel Fabriciano, Brazil · Remote (overlaps US/EU time zones)

eduardosnoliveira@gmail.com · [LinkedIn](#) · [GitHub](#) · [WhatsApp](#)

SUMMARY

Senior back-end engineer with 5+ years building microservices and event-driven systems on AWS in C#/.NET 8 and Java/Spring Boot. Owns design and delivery on a 50M+ user rewards platform across 3 business segments, where I cut MTTR ~30% and ran zero-downtime deploys through ~3x campaign traffic spikes. Strong in Domain-Driven Design, Clean Architecture, Apache Kafka, and SQL Server/PostgreSQL/DynamoDB, with production observability in Datadog and Splunk. English C2 (EF SET certified).

EXPERIENCE

CI&T — Senior Software Engineer

Client: Itaú · C#/.NET, Java/Spring Boot, AWS · April 2025 – Present · Remote

- Built and evolved AWS microservices in C#/.NET and Java/Spring Boot for a 50M+ user platform, supporting expansion from 2 to 3 business segments with zero backward-compatibility breaks
- Redesigned domain contracts and service boundaries over async Kafka messaging, cutting cross-team coupling and unblocking parallel delivery for 4 teams across bounded contexts
- Cut MTTR ~30% by improving production observability with Datadog, Splunk, and StackSpot to speed incident detection and root-cause analysis
- Tuned DynamoDB, ECS, and EC2 layers to absorb ~3x marketing-campaign traffic spikes and ship zero-downtime deploys via canary releases and feature flags
- Led ~15 PRs/week in code review and mentored 2 mid-level engineers on event-driven and AWS practices, coordinating delivery with product, QA, and SRE

Base2 Tecnologia — Senior Software Engineer

Solar energy platform · .NET, AWS · April 2024 – April 2025 · Remote

- Owned end-to-end design and delivery of REST APIs and sync/async integrations in .NET Core, C#, ASP.NET Core Web API, Entity Framework, and Dapper
- Cut response time ~40% on the busiest endpoints via targeted MariaDB indexing, query tuning, and Dapper in hot paths
- Took test coverage from 0 to ~90% by building the project's first unit and integration suites (xUnit, NSubstitute, Testcontainers) plus NBomber load/stress, all in CI/CD
- Integrated AWS S3, SQS, SNS, CloudWatch, and Lambda for async workflows and built Docker dev environments and Grafana dashboards, cutting local setup time and giving the team real-time async visibility
- Shipped customer-facing React/TypeScript frontend alongside the APIs, delivering features end to end without a separate frontend handoff

Base2 Tecnologia — Mid-Level Software Engineer

.NET, AWS · January 2023 – April 2024 · Remote

- Delivered core backend features — REST APIs, batch processing, third-party integrations — in .NET Core, ASP.NET Core Web API, Entity Framework, and Dapper
- Cut production regressions ~50% by introducing automated unit, integration, and load testing to a manual-QA team
- Cut new-developer setup from ~1 day to under 1 hour by containerizing local development with Docker Compose

- Promoted to Senior after ~15 months; ran new-hire onboarding and became the team's reference for backend architecture decisions

Markup Sistemas — Junior Software Engineer

.NET Framework, SQL Server · 2021 – 2022 · Ipatinga, Brazil

- Built 4 ERP modules end to end (manufacturing, billing, delivery, point-of-sale) in C#/.NET Framework 4.8, ASP.NET MVC, and Razor for industrial clients
- Cut report run times ~50% on large datasets by tuning T-SQL queries, stored procedures, and Entity Framework on SQL Server
- Cut daily data-entry time for ~50 internal users by reworking the backoffice UI in HTML, CSS, and jQuery

LANGUAGES & TECHNOLOGIES

Languages: C#, Java, TypeScript, JavaScript, SQL

Backend: .NET 8/7/6/Core, ASP.NET Core, ASP.NET Core Web API, Spring Boot, Entity Framework Core, Dapper, LINQ

Cloud & DevOps: AWS (ECS, EC2, Lambda, DynamoDB, S3, SQS, SNS, CloudWatch), Docker, Kubernetes, Terraform, CI/CD, GitHub Actions, Azure DevOps

Data: SQL Server, PostgreSQL, MariaDB, DynamoDB

Architecture: Microservices, Event-Driven Architecture, Apache Kafka, Domain-Driven Design, Clean/Hexagonal Architecture, SOLID, Distributed Systems

Testing & Observability: xUnit, NSubstitute, Testcontainers, NBomber, Datadog, Splunk, Grafana

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (in progress, target 2026)
- EF SET English Certificate — C2 Proficient (71/100), 2023

EDUCATION

- **B.S. in Computer Science** — Estácio, Brazil (in progress, expected 2027)
- **Postgraduate, Software Architecture** — Instituto Faculeste, 2025
